

Deb Schultz

North Central Bank – Past President

Welcome to our outdoor oasis, 17 years in the making, made up of wire corn cribs and old government grain bins we had brought to our property.

Join our coffee chat to take a tour starting with our two level, She Shed/He Shed. We will then move into our outdoor living space contained inside of old wire corn cribs with one being two levels high. This space contains our pig feeder base family table with a fire feature in the center as well as our serving area and 1 of our four ornamental ponds connected to it. This pond has a unique ladder waterfall. 2 of our outdoor ornamental ponds have waterfalls. The wire corn cribs join a deck with a grain bin roof featuring a drying floor (from the grain bins) fireplace wall. This outdoor living space connects to our pool.

Our pool is an above ground pool with a walking path around it that leads to our sanctuary garden. You enter and exit this space through Grain bin base rings. Don't miss our fire bowl features above the entrance to our sanctuary garden. The path continues to our patio with our Drying floor pergola and our fire pit outdoor entertaining area which includes a pig feeder pub table.

We also have additional grain bins turned into great spaces for fun and outdoor activities. One grain bin is our grandkids playhouse with inside playground as well as a large outdoor sandbox under grain bin panels for the roof. We turned one grain bin into a bathroom for easy use outside and one contains our mower and work bench.

I hope you can join me for this tour of our yard that brings us so much joy!
